PREFACE.....	x
What is this Book About?	xj
Readership and Outline	xiii
Acknowledgements.....	xvi

CHAPTER 1: ACCIDENTS AND CAUSES

INTRODUCTION	1
What is an Accident?	3
A Little Etymology.....	4
<i>Definition of Accident</i>	5
<i>Accidents versus Good Luck</i>	7
<i>Accident as Noun and as Verb</i>	8
ACCIDENTS, CAUSES AND CONSEQUENCES.....	10
Unwanted Outcomes.....	10
<i>Lack of Unwanted Outcome</i>	13
Unexpected Events.....	13
<i>Beyond Design-Base Accidents</i>	15
Intended Acts and Unintended Outcomes.....	16
The Grounding of <i>s/s</i> Stockholm.....	17
Accidents, Incidents, and Near Misses.....	20
THE SEARCH FOR CAUSES.....	25
Facts and Explanations.....	26
The Difference between Explanations and Causes.....	27
From Technological Failure to 'Human Error'.....	29
Causality and Time.....	31
Evolving Concepts of Causes.....	32
A Cynical Definition of Causes.....	34

CHAPTER 2: THINKING ABOUT ACCIDENTS

INTRODUCTION	36
The Search for Causes in Science and Philosophy	38
<i>The Big Bang</i>	39
Causality	41
THE NEED FOR ACCIDENT MODELS	44
Sequential Accident Models	47
<i>The Root Cause</i>	51
Epidemiological Accident Models	54
<i>Performance Deviations</i>	54
<i>Environmental Conditions</i>	54
<i>Barriers</i>	54
<i>Latent Conditions</i>	55
Systemic Accident Models	59
<i>The Sharp End and the Blunt End</i>	62
<i>Consequences of Systemic Models</i>	65
Comments to the Models	65

CHAPTER 3: BARRIER FUNCTIONS AND BARRIER SYSTEMS

INTRODUCTION	68
Origin of Barriers	69
Barrier Examples	71
Getting In and Out of Doors	72
<i>Accidents in Sweden</i>	73
Barriers and Accidents	76
USE AND DESCRIPTION OF BARRIERS	78
The Prevention of Accidents	79
Barriers and MORT	79
The Barrier Concept in Risk Analysis	81
The Accident Evolution and Barrier (AEB) Model	82
Barriers and Latent Failures	83
Barriers in Software Systems	84
CLASSIFICATION OF BARRIERS	85

Classification Based on the Origin of Barrier	85
Classification Based on Purpose of Barrier	86
Classification Based on Barrier Location	86
A Classification of Barrier Systems	87
A Classification of Barrier Functions	89
Composite Barrier Systems	94
Bus Doors Revisited	96
BARRIER ANALYSIS AND BARRIER DESIGN	97
Barrier Quality	97
<i>Physical Barrier Systems</i>	99
<i>Functional Barrier Systems</i>	100
<i>Symbolic Barrier Systems</i>	101
<i>Incorporeal Barrier Systems</i>	102
Barriers and Failure Modes	104
OTHER TYPES OF BARRIERS	106
Organisational Barriers	107

CHAPTER 4: UNDERSTANDING THE ROLE OF BARRIERS IN ACCIDENTS

INTRODUCTION	109
REPRESENTATION OF BARRIERS IN ACCIDENT ANALYSIS	110
Fault trees	112
<i>Wrong Drug Dispensed</i>	114
Event Trees	115
Fault Trees and Event Trees Compared	117
<i>The AEB Model</i>	118
<i>Variation Diagrams</i>	119
Representing Barriers in Accident Descriptions	121
The Limitation of Graphical Representations	123
<i>The Systemic View</i>	124

COMPLEXITY OF BARRIER FUNCTIONS	129
Reciprocity	129
Barrier Bypass.....	130
Unintended Barriers	132
Bi-Directional Barriers	133
BARRIERS AND ACCIDENT PREVENTION	135
Responding to Accidents.....	136

CHAPTER 5: A SYSTEMIC ACCIDENT MODEL

INTRODUCTION	140
Time and Variability	142
THE PRINCIPLE OF EFFICIENCY-THOROUGHNESS	
TRADE-OFF	144
Nominal and Actual Conditions of Work.....	145
The Paradox of Optimal Performance.....	147
The Need for Local Optimisation.....	149
Why Things (Sometimes) go Wrong.....	150
ETTO Rules	152
<i>ETTO on the Level of Cognitive Functioning</i>	153
<i>ETTO on the Level of Individual Work</i>	154
<i>ETTO on the Organisation Level</i>	156
ETTO in Practice	156
The Sources of Success.....	159
STOCHASTIC RESONANCE AS A MODEL FOR	
ACCIDENTS.....	159
Tacoma Narrows Bridge.....	162
London Millennium Bridge.....	163
Stochastic Resonance	164
Resonance in Complex Systems	167
From Stochastic to Functional Resonance	170
Functional Resonance Accident Model (FRAM).....	173
About FRAM	175

CHAPTER 6: ACCIDENT PREVENTION

INTRODUCTION	177
The Reality of Risks	178
Requisite Imagination.....	181
Harnessing Imagination	183
ACCIDENT PREDICTION	185
Step One: Identify Essential System Functions	187
Step Two: Determine the Potential for Variability	189
<i>Common Performance Conditions</i>	190
Step Three: Define Functional Resonance Based on Dependencies among Functions	193
<i>Finding the Expected Connections</i>	194
<i>Finding the Unexpected Connections</i>	196
Step Four: Deciding on Countermeasures	199
PERFORMANCE VARIABILITY MANAGEMENT	200
Detection and Control of Performance Variability	201
THE RECEDING SHARP END	205
BIBLIOGRAPHY	209
AUTHOR INDEX.....	216
SUBJECT INDEX	219
