List of Figures	ix
List of Tables	xi
Preface	xiii
1 Human Performance Problems in Maintenance	1
The bad news	1
The good news	3
Removal versus replacement	4
Commission versus omission errors	6
Summary	7
2 The Human Risks	9
Taking a systems view	9
Systems with human elements	10
Human-related disturbances	11
Each disturbance has a history	12
Systems build defences against foreseeable disturbances	12
System defences can also fail	14
The moral issue	14
Errors are like mosquitoes	16
Looking ahead	17
3 The Fundamentals of Human Performance	19
Psychology meets engineering	19
A 'blueprint' of mental functioning	20
Limitations of the conscious workspace	21
Attention	22
The vigilance decrement	24
Attention and habit	24
Control modes and situations	25
Three performance levels	27

Stages in acquiring a skill	30
Fatigue	31
Stressors	32
Arousal	33
Coping with informational overload	33
Personality types	34
Biases in thinking and decision making	35
Summary	36
4 The Varieties of Error	39
What is an error?	39
Skill-based recognition failures, slips and lapses	40
Rule-based mistakes	49
Knowledge-based errors	51
Violations	53
Violation types	55
The consequences of maintenance errors	59
Summary	60
5 Local Error-provoking Factors	63
Documentation	64
Time pressure	65
Housekeeping and tool control	65
Coordination and communication	66
Tools and equipment	67
Fatigue	68
Knowledge and experience	70
Bad procedures	70
Procedure usage	72
Personal beliefs: a factor promoting violations	73
Links between errors and error-provoking conditions	74
Summary	75
6 Three System Failures and a Model of Organizational Accidents	77
Latent conditions and active failures	77
The Embraer 120 crash: a shift turnover failure	78
The Clapham Junction rail collision: the defences that faded away	82
The <i>Piper Alpha</i> explosion: Failures of both the permit-to-work and the shift handover systems	86
Modelling organizational accidents	89

Defences	91
Summary	93
7 Principles of Error Management	95
Nothing new	95
The principles of error management	96
The management of error management	100
Summarizing the EM principles	101
8 Person and Team Measures	103
Person measures	103
Team measures	113
Summary	117
9 Workplace and Task Measures	119
Fatigue management	119
Task frequency	120
Design	122
Housekeeping	124
Spares, tools and equipment	124
Using procedures to manage omissions	125
Summary	132
10 Organizational Measures	133
How accidents happen: a reminder	133
Reactive and proactive measures: working together	134
Reactive outcome measures	135
Proactive process measures	138
Identifying gaps in the defences	141
Summary	143
11 Safety Culture	145
What is a safety culture?	145
Can a safer culture be engineered?	147
Creating a just culture	148
Creating a reporting culture	151
Creating a learning culture	153
Types of safety culture: the good, the bad and the average	155
Summary	156

12	Making it Happen: The Management of Error Management	159
	Here comes another one	159
	The common features of safety and quality management systems	162
	Why error management is necessary	164
	More on mindset	165
	In search of resilience	166
	Summary	174
	Index	177
