<b>ACKNOWLEDGMENTS</b> .....	<b>x</b>
<b>PREFACE</b> .....	<b>xi</b>
<b>UNITS AND NOMENCLATURE</b> .....	<b>xv</b>
<b>1. PREPARATION FOR MAINTENANCE</b> .....	<b>1</b>
1.1 Isolation, 1	
1.2 Identification, 10	
1.3 Removal of hazards, 15	
1.4 Procedures not followed, 22	
1.5 Quality of maintenance, 29	
<b>2. MODIFICATIONS</b> .....	<b>40</b>
2.1 Startup modifications, 40	
2.2 Minor modifications, 41	
2.3 Modifications made during maintenance, 46	
2.4 Temporary modifications, 47	
2.5 Sanctioned modifications, 49	
2.6 Process modifications, 51	
2.7 New tools, 53	
2.8 Organizational changes, 55	
2.9 Gradual changes, 55	
2.10 Modification chains, 57	
2.11 Modifications made to improve the environment, 58	
2.12 Control of modifications, 62	
<b>3. ACCIDENTS CAUSED BY HUMAN ERROR</b> .....	<b>65</b>
3.1 Introduction, 65	
3.2 Accidents caused by simple slips, 66	

3.3	Accidents which could be prevented by better training, 75	
<b>4.</b>	<b>LABELING</b> .....	<b>82</b>
4.1	Labeling of equipment, 82	
4.2	Labeling of instruments, 84	
4.3	Labeling of chemicals, 86	
4.4	Labels not understood, 87	
<b>5.</b>	<b>STORAGE TANKS</b> .....	<b>89</b>
5.1	Overfilling, 89	
5.2	Overpressuring, 91	
5.3	Sucking-in, 95	
5.4	Explosions, 97	
5.5	Floating roof tanks, 102	
5.6	Miscellaneous incidents, 107	
5.7	FRP tanks, 110	
<b>6.</b>	<b>STACKS</b> .....	<b>113</b>
6.1	Stack explosions, 113	
6.2	Blocked stacks, 116	
<b>7.</b>	<b>LEAKS</b> .....	<b>119</b>
7.1	Some common sources of leaks, 119	
7.2	Control of leaks, 126	
7.3	Leaks onto water, wet ground, or insulation, 132	
7.4	Detection of leaks, 134	
7.5	Fugitive emissions, 134	
<b>8.</b>	<b>LIQUEFIED FLAMMABLE GASES</b> .....	<b>137</b>
8.1	Major leaks, 138	
8.2	Minor leaks, 144	
8.3	Other leaks, 145	
<b>9.</b>	<b>PIPE AND VESSEL FAILURES</b> .....	<b>148</b>
9.1	Pipe failures, 148	
9.2	Pressure vessel failures, 164	
<b>10.</b>	<b>OTHER EQUIPMENT</b> .....	<b>170</b>
10.1	Centrifuges, 170	
10.2	Pumps, 171	
10.3	Air coolers, 173	
10.4	Relief valves, 173	
10.5	Heat exchangers, 181	

10.6	Cooling towers, 184	
10.7	Furnaces, 184	
<b>11.</b>	<b>ENTRY TO VESSELS</b> .....	<b>192</b>
11.1	Vessels not freed from hazardous materials, 192	
11.2	Hazardous materials introduced, 194	
11.3	Vessels not isolated from sources of danger, 196	
11.4	Unauthorized entry, 199	
11.5	Entry into vessels with irrespirable atmospheres, 200	
11.6	Rescue, 201	
11.7	Analysis of vessel atmospheres, 202	
11.8	What is a confined space?, 202	
<b>12.</b>	<b>HAZARDS OF COMMON MATERIALS</b> .....	<b>205</b>
12.1	Compressed air, 205	
12.2	Water, 207	
12.3	Nitrogen, 209	
12.4	Heavy oils, 215	
<b>13.</b>	<b>TANK TRUCKS AND CARS</b> .....	<b>222</b>
13.1	Overfilling, 222	
13.2	Burst hoses, 223	
13.3	Fires and explosions, 225	
13.4	Liquefied flammable gases, 226	
13.5	Compressed air, 226	
13.6	Tipping up, 227	
13.7	Emptying into or filling from the wrong place, 228	
13.8	Contact with live power lines, 229	
<b>14.</b>	<b>TESTING OF TRIPS AND OTHER PROTECTIVE SYSTEMS</b> .....	<b>231</b>
14.1	Testing should be thorough, 231	
14.2	All protective equipment should be tested, 233	
14.3	Testing can be overdone, 236	
14.4	Protective systems should not reset themselves, 236	
14.5	Trips should not be disarmed without authorization, 237	
14.6	Instruments should measure directly what we need to know, 239	
14.7	Trips are for emergencies, not for routine use, 240	
14.8	Tests may find faults, 241	
14.9	Some miscellaneous incidents, 242	

<b>15. STATIC ELECTRICITY</b> .....	<b>244</b>
15.1 Static electricity from flowing liquids, 245	
15.2 Static electricity from gas and water jets, 247	
15.3 Static electricity from powders and plastics, 248	
15.4 Static electricity from clothing, 250	
<b>16. MATERIALS OF CONSTRUCTION</b> .....	<b>252</b>
16.1 Wrong material used, 252	
16.2 Hydrogen produced by corrosion, 255	
16.3 Other effects of corrosion, 256	
16.4 Loss of protective coatings, 257	
16.5 Some other incidents caused by corrosion, 257	
<b>17. OPERATING METHODS</b> .....	<b>260</b>
17.1 Trapped pressure, 260	
17.2 Clearing choked lines, 261	
17.3 Faulty valve positioning, 263	
17.4 Responsibilities not defined, 265	
17.5 Communication failures, 266	
17.6 Work at open manholes, 268	
17.7 One line, two duties, 269	
17.8 Inadvertent isolation, 269	
17.9 Incompatible storage, 270	
17.10 Maintenance—is it really necessary?, 270	
<b>18. REVERSE FLOW AND OTHER UNFORESEEN DEVIATIONS</b> .....	<b>273</b>
18.1 Reverse flow from a product receiver or blowdown line back into the plant, 273	
18.2 Reverse flow into service mains, 275	
18.3 Reverse flow through pumps, 277	
18.4 Reverse flow from reactors, 277	
18.5 Reverse flow from drains, 279	
18.6 Other deviations, 279	
18.7 A method for foreseeing deviations, 281	
18.8 HAZOP of tank trucks, 282	
<b>19. I DIDN'T KNOW THAT</b> .....	<b>285</b>
19.1 Ammonia can explode, 285	
19.2 Hydraulic pressure tests can be hazardous, 287	
19.3 Diesel engines can ignite leaks, 288	
19.4 Carbon dioxide can ignite a flammable mixture, 289	
19.5 Mists can explode, 290	

<b>20. PROBLEMS WITH COMPUTER CONTROL</b> .....	<b>292</b>
20.1 Hardware and software faults, 292	
20.2 Treating the computer as a black box, 293	
20.3 Misjudging the way operators will respond, 297	
20.4 Other problems, 298	
20.5 Conclusions, 300	
<b>21. INHERENTLY SAFER DESIGN</b> .....	<b>302</b>
21.1 Bhopal, 302	
21.2 Other examples of inherently safer design, 306	
21.3 User-friendly design, 310	
<b>22. REACTIONS—PLANNED AND UNPLANNED</b> .....	<b>312</b>
22.1 Lack of knowledge, 312	
22.2 Poor mixing, 314	
22.3 Contamination, 315	
22.4 Reactions with auxiliary materials, 316	
22.5 Poor training or procedures, 317	
22.6 "Use by" dates, 318	
<b>RECOMMENDED READING</b> .....	<b>321</b>
<b>INDEX</b> .....	<b>322</b>
